Vivak® Design

The matte-effect material for stylish interior design

What is special about Vivak® Design?

This innovative material does what others cannot do - it combines contrasting properties. On the one hand, it is lightweight and lively, on the other solid and striking. Just take a look at the texture of a **Vivak® Design** sheet, with its two fascinating fine matte surfaces. When you test the material, you will discover its impact strength.

Vivak® Design is particularly suited for interior design. It offers boundless creative scope for all types of rooms, and makes for a high-class, pleasant atmosphere, whether it is used for large surfaces or only to accentuate other materials.

Use **Vivak® Design** in offices for partitions, filing cupboards or consoles. Employ it for P.O.P. displays to show off your products to their best advantage. Or add a touch of beauty where it is least expected. With **Vivak® Design**, factory units take on a completely different look.

Vivak® Design is waiting to be discovered. Let your imagination run free!

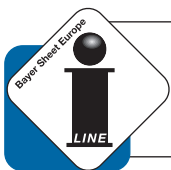

What are the benefits of Vivak® Design?

Vivak® Design sheets are:

- extremely easy to form. Their thermoforming properties make for energy savings and short production times.
- highly resistant to breakage due to their high impact strength. They can be easily machined with conventional tools.
- flame-retarded, with the corresponding fire rating. This makes them the safe solution for many areas.
- available in transparent matte and white matte grades.
- supplied in 2–5 mm thickness. Other sizes and colours are available on request.
- on request also available in a UV-protected version.

Where is Vivak® Design used?

- Interior design: partitions, furniture, lighting elements etc.
- Displays: hotels, stores, industry, offices etc.
- Exhibition booths: walls, ceilings, floors, counters, pillars etc.
- Store fixtures: modular concepts and individual solutions.

i-line

Ideas, innovative, intelligent, interesting...
